- Golf Course Path's
- Drive Thru's
- Roadways
- Virtually any exterior concrete surface that you can walk or drive on

Concrete is one of the most widely used products in all the construction industry for pedestrian and vehicular traffic and yet people simply accept that it is gray, plain and blah. Property owners spend thousands of dollars on landscaping, paint, architectural upgrades and more to improve the look of their property; so why not improve the look of their existing concrete as well?

With Decorative Concrete Exterior Finishes from Elite Crete Systems, we can do just that. No tear out and replacement required...Don't think of our time-tested, proven performance finishes as a temporary paint job or faux finish. These applications are tough, real tough. Strong enough to take the abuse of constant vehicular traffic tough. Although the beauty of our finishes is the initial attractive feature, there are many added benefits that they present as well.

BENEFITS OF DECORATIVE CONCRETE EXTERIOR FINISHES:

- Virtually unlimited designs, patterns, textures and color options
- Can create the authentic look and feel of any stone, brick, tile, even wood and more
- Available in any color combination you desire to match surrounding design and theme
- Complete project customization in terms of texture, pattern, color, design and depth
- Very affordable and cost effective compared to: full depth stamped concrete, pavers, brick, real stone and integrally colored concrete. Even less than complete tear out and re-pour
- Extreme durability for high traffic areas, even vehicular traffic
- Did we mention our Decorative Concrete Exterior Finishes are so strong that they can handle vehicular traffic
- Virtually no maintenance
- Highly resistant to deicing salts, freeze/thaw climates, extreme heat, wet conditions and UV rays
- Skid resistant options create a non-slip finish. Even in wet conditions
- Quick installation time—days not weeks like other similar products
- VOC free options—being “Green” is important to you and important to us
- Can be installed pre or post construction
- For new or existing concrete surfaces regardless of most conditions
